GROWING TOGETHER. ALL YEAR LONG.

Seed

With many years of experience in running gear technology, BPW offers different solutions for all areas of application. For seed drills with restricted space, BPW has developed a compact welded design; this renders welding work for our customers unnecessary with the integration.

The brands of the BPW Group:

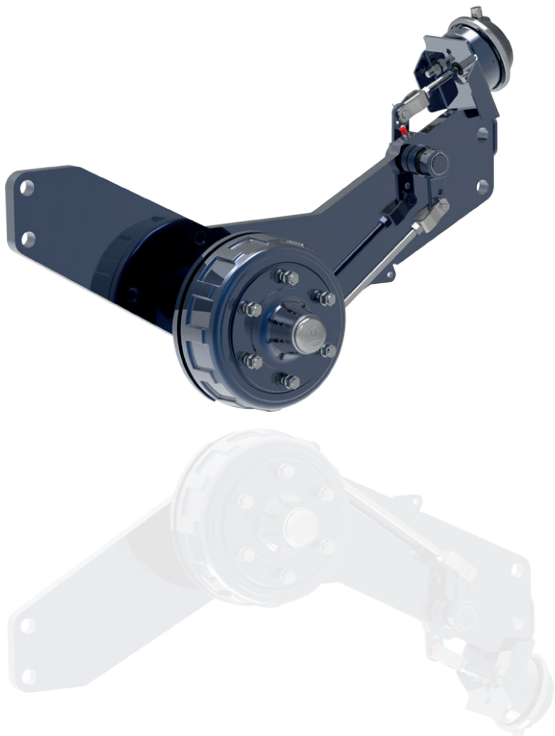

we think transport

Seed

Benefits that convince

- Customised complete solutions with low spatial conditions
- Tailored design for customer vehicles
- FEM tested design for a long service life
- Integration without additional welding work
- EU-regulatory-compliant brakes

Technical data - Axle beam GS 5506

- 80 mm solid axle beam / brake 310x80
- GS 5506 Bearing – 5 tonnes axle load
- Manual slack adjuster
- Brake actuation with deflection lever
- KTL coating

THE BPW EFFECT

100 %

free of welding*

Technical data - Brake axle GS 5506

- 60 mm solid axle beam / brake 310x80
- GS 5506 Bearing – 5 tonnes axle load
- Special lever with brake scale
- KTL coating
